EDUCATION

2015 - 2020

Master of Engineering

National Institute of Applied Sciences of Rouen

Deep Learning | Machine Learning | Optimization
Databases | Computer Vision | Programming
Numerical Analysis | Statistics | Algorithmic
Signal Processing | Web & Mobile Development

Class ranks:

2017 - 2020: **1st** / 48 2015 - 2017: 9th / 242

2019 - 2020

Master Data Science & Engineering Double degree with Rouen University

SKILLS

C / C++ | Git | HTML / CSS | Java | JavaScript Keras | Linux | Python | PyTorch | SQL

LANGUAGES

French & English: Bilingual

German: B2 Level (Limited working proficiency)

QUALITIES

Hardworking | Perseverant | Reliable

PROFESSIONAL EXPERIENCE

Expressive Text-to-Speech

Jun - Oct 2020

Internship at SoftBank Robotics Europe. • Paris

<u>Goal</u>: Study the state of the art concerning Text-to-Speech. Train and compare relevant networks in order to make a robot's voice more expressive using Deep Learning.

Chatbot

STRATOW

Jan - May / Sep - Dec 2019

Part-time project for STRATOW Order. ♥ Rouen

<u>Goal</u>: Compare existing Chatbot solutions and adapt one to make it easier for customers to place orders/access their account information on an amazon-like platform called STRATOW Order.

Image Classification and Segmentation

Jun - Aug 2019

Internship at Luxscan. Q Luxembourg

<u>Goal</u>: Identify wood cutting patterns which vary depending on how the log was cut.

PROJECT EXPERIENCE

Gradient Descent Visualization Tool

Apr 2020

<u>Goal</u>: Learn to code in C++ and create a gradient descent visualization tool to better understand optimization hyperparameters used in Deep Learning. <u>See more</u>, <u>Demo</u>

Deep Learning (GAN) & GTA V

Jan - May 2019

<u>Goal</u>: Generate photorealistic images from segmented images extracted from the GTA V video game. See more

Animal Classification in Images

Mar - Apr 2019

<u>Goal</u>: Train a Deep Learning model (VGG-16) in Keras library on a dataset of animal images. See more

Applnsa

Sep - Dec 2018

<u>Goal</u>: Develop an Android app for my university (retrieve the student's timetable and add it to a calendar app, retrieve INSA contacts to send emails more easily, login to Moodle (an Opensource learning platform)). Demo
